

Shift Scheduling & Extended Workforce Management

In Microsoft Teams

Spend less time scheduling

A busy manager deserves a scheduling sidekick – get mobile tools so you can take care of the business's fluctuating needs on-the-go and focus on doing your best work.

Your schedule your way

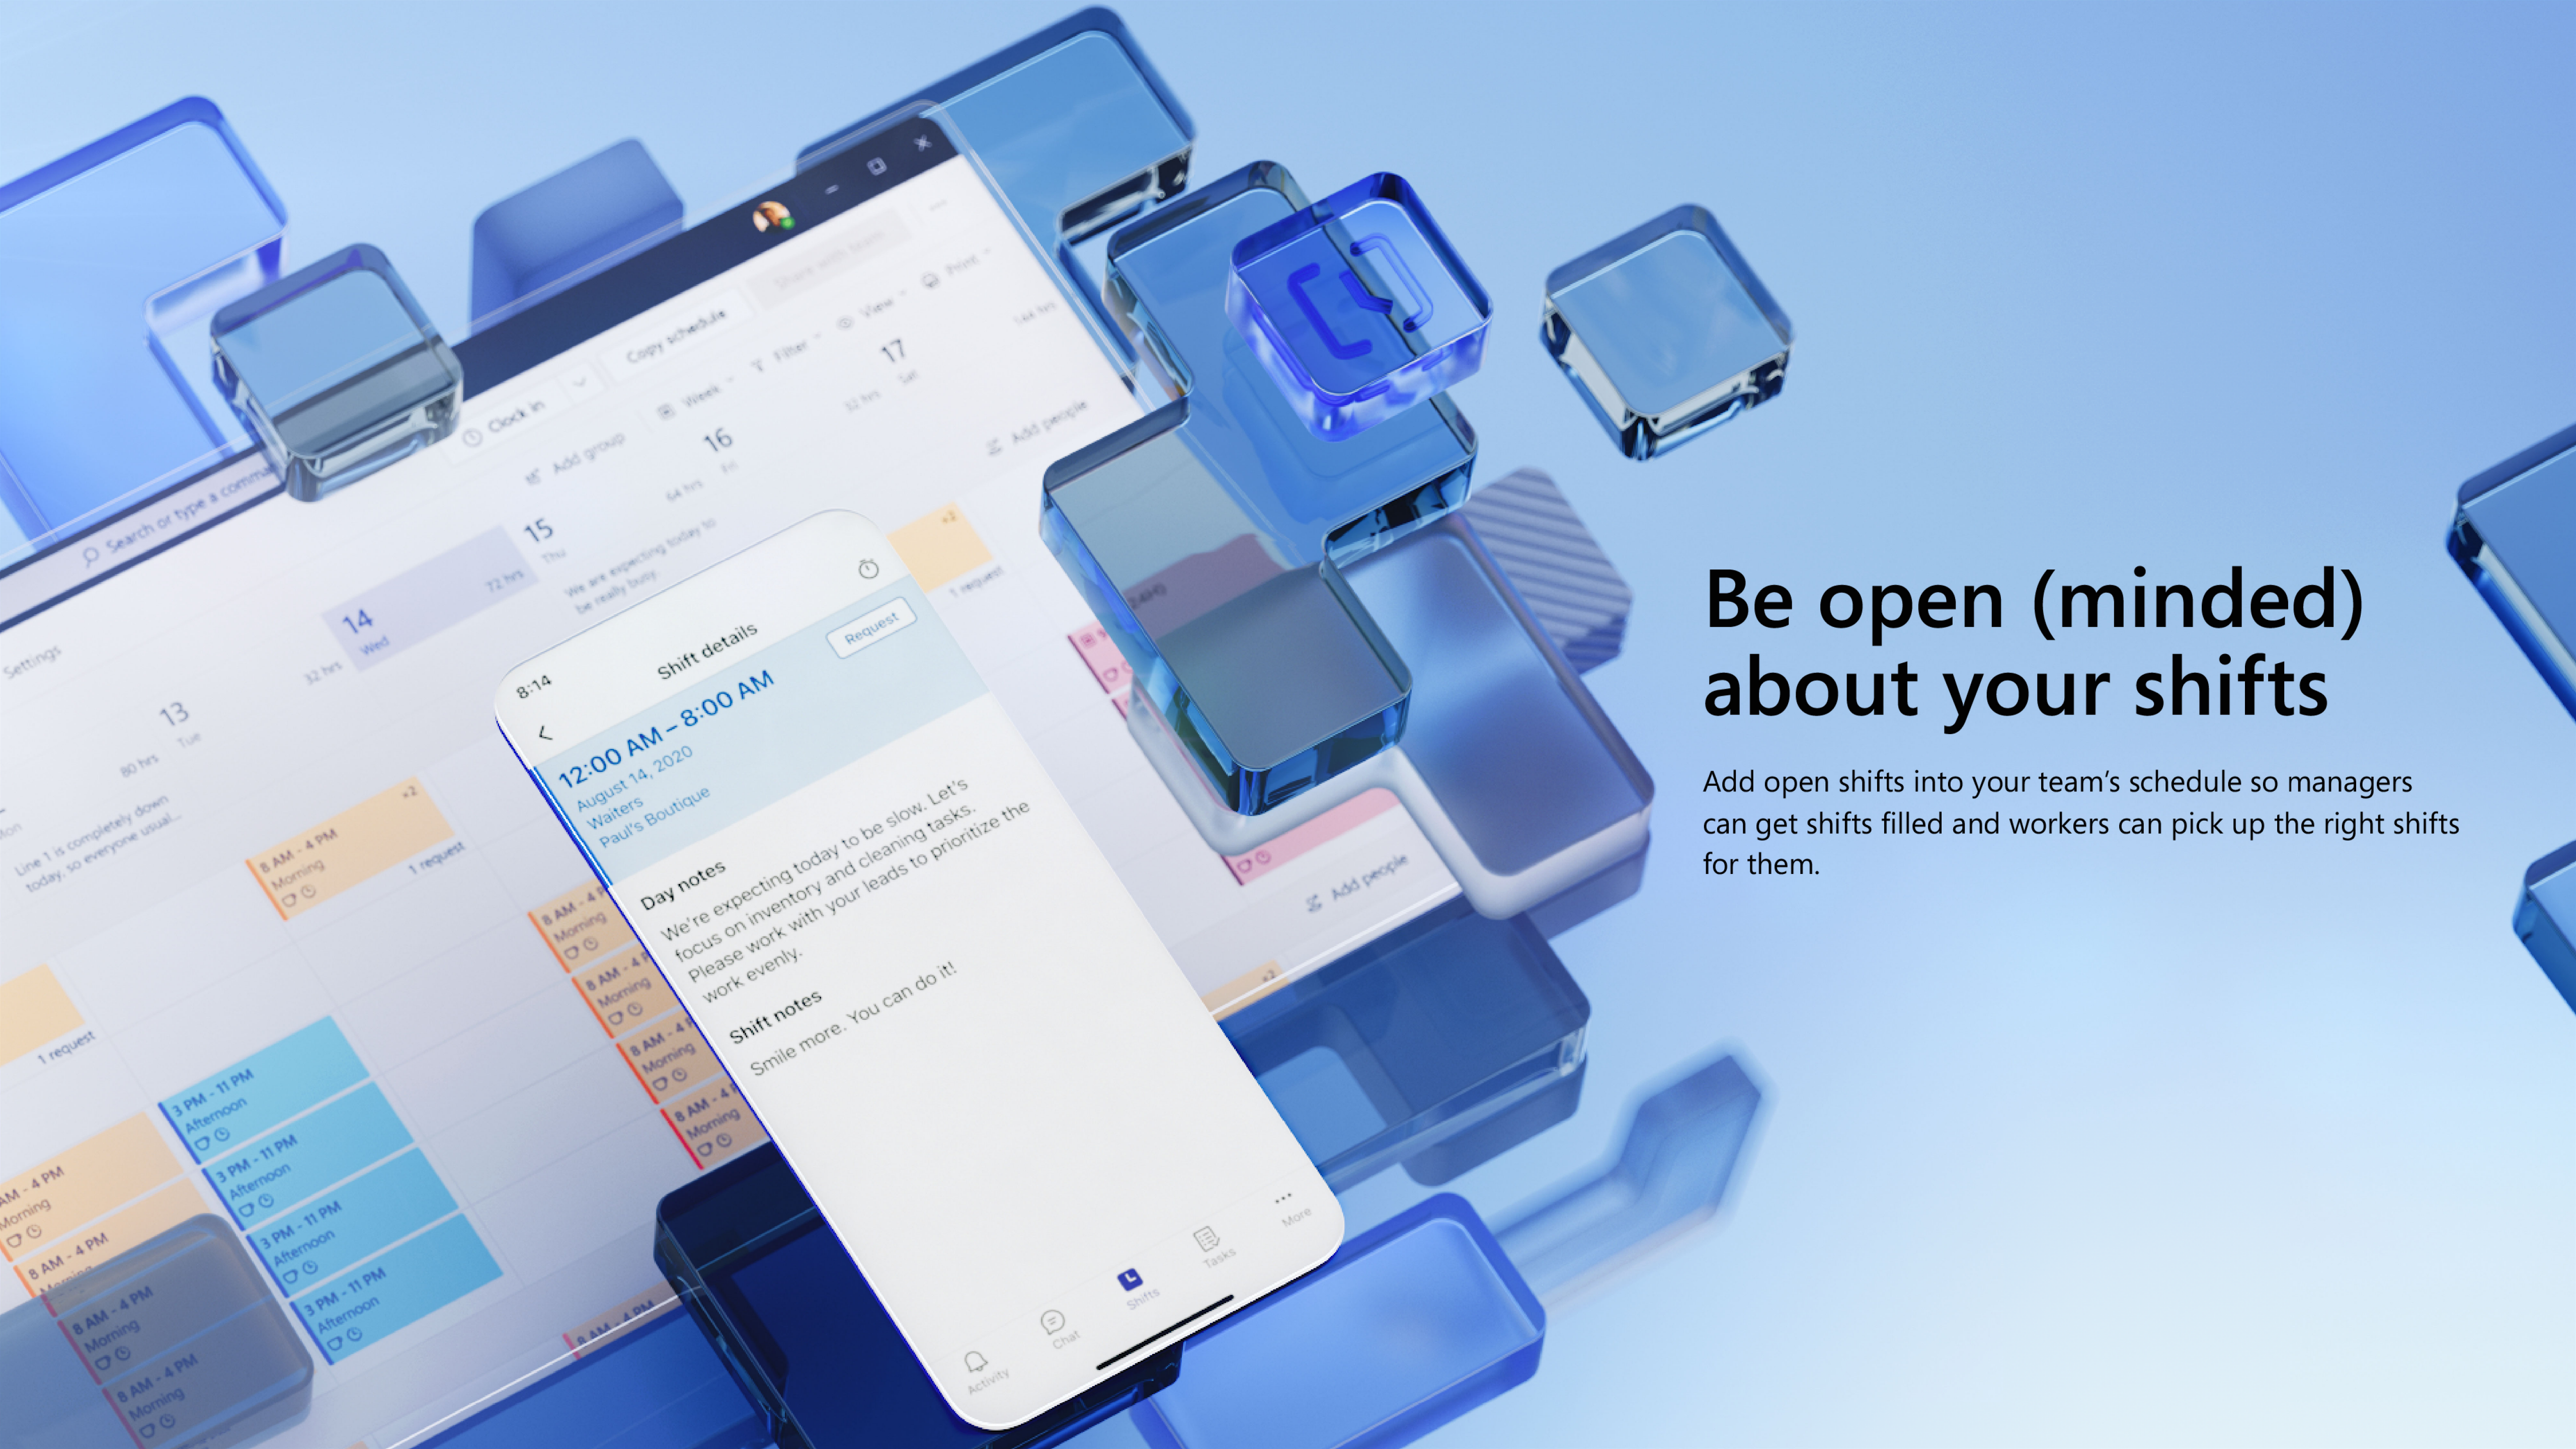

It's up to you how it begins and up to us to get you there.

Whether you want to upload from Excel, start from scratch, copy from the week prior or import and work through your existing workforce management system, we have got you covered.

Cut the chaos out of scheduling

Enable self-service tools like requesting time off and swapping shifts so employees can own their schedules and spend less time making sure shifts are covered.

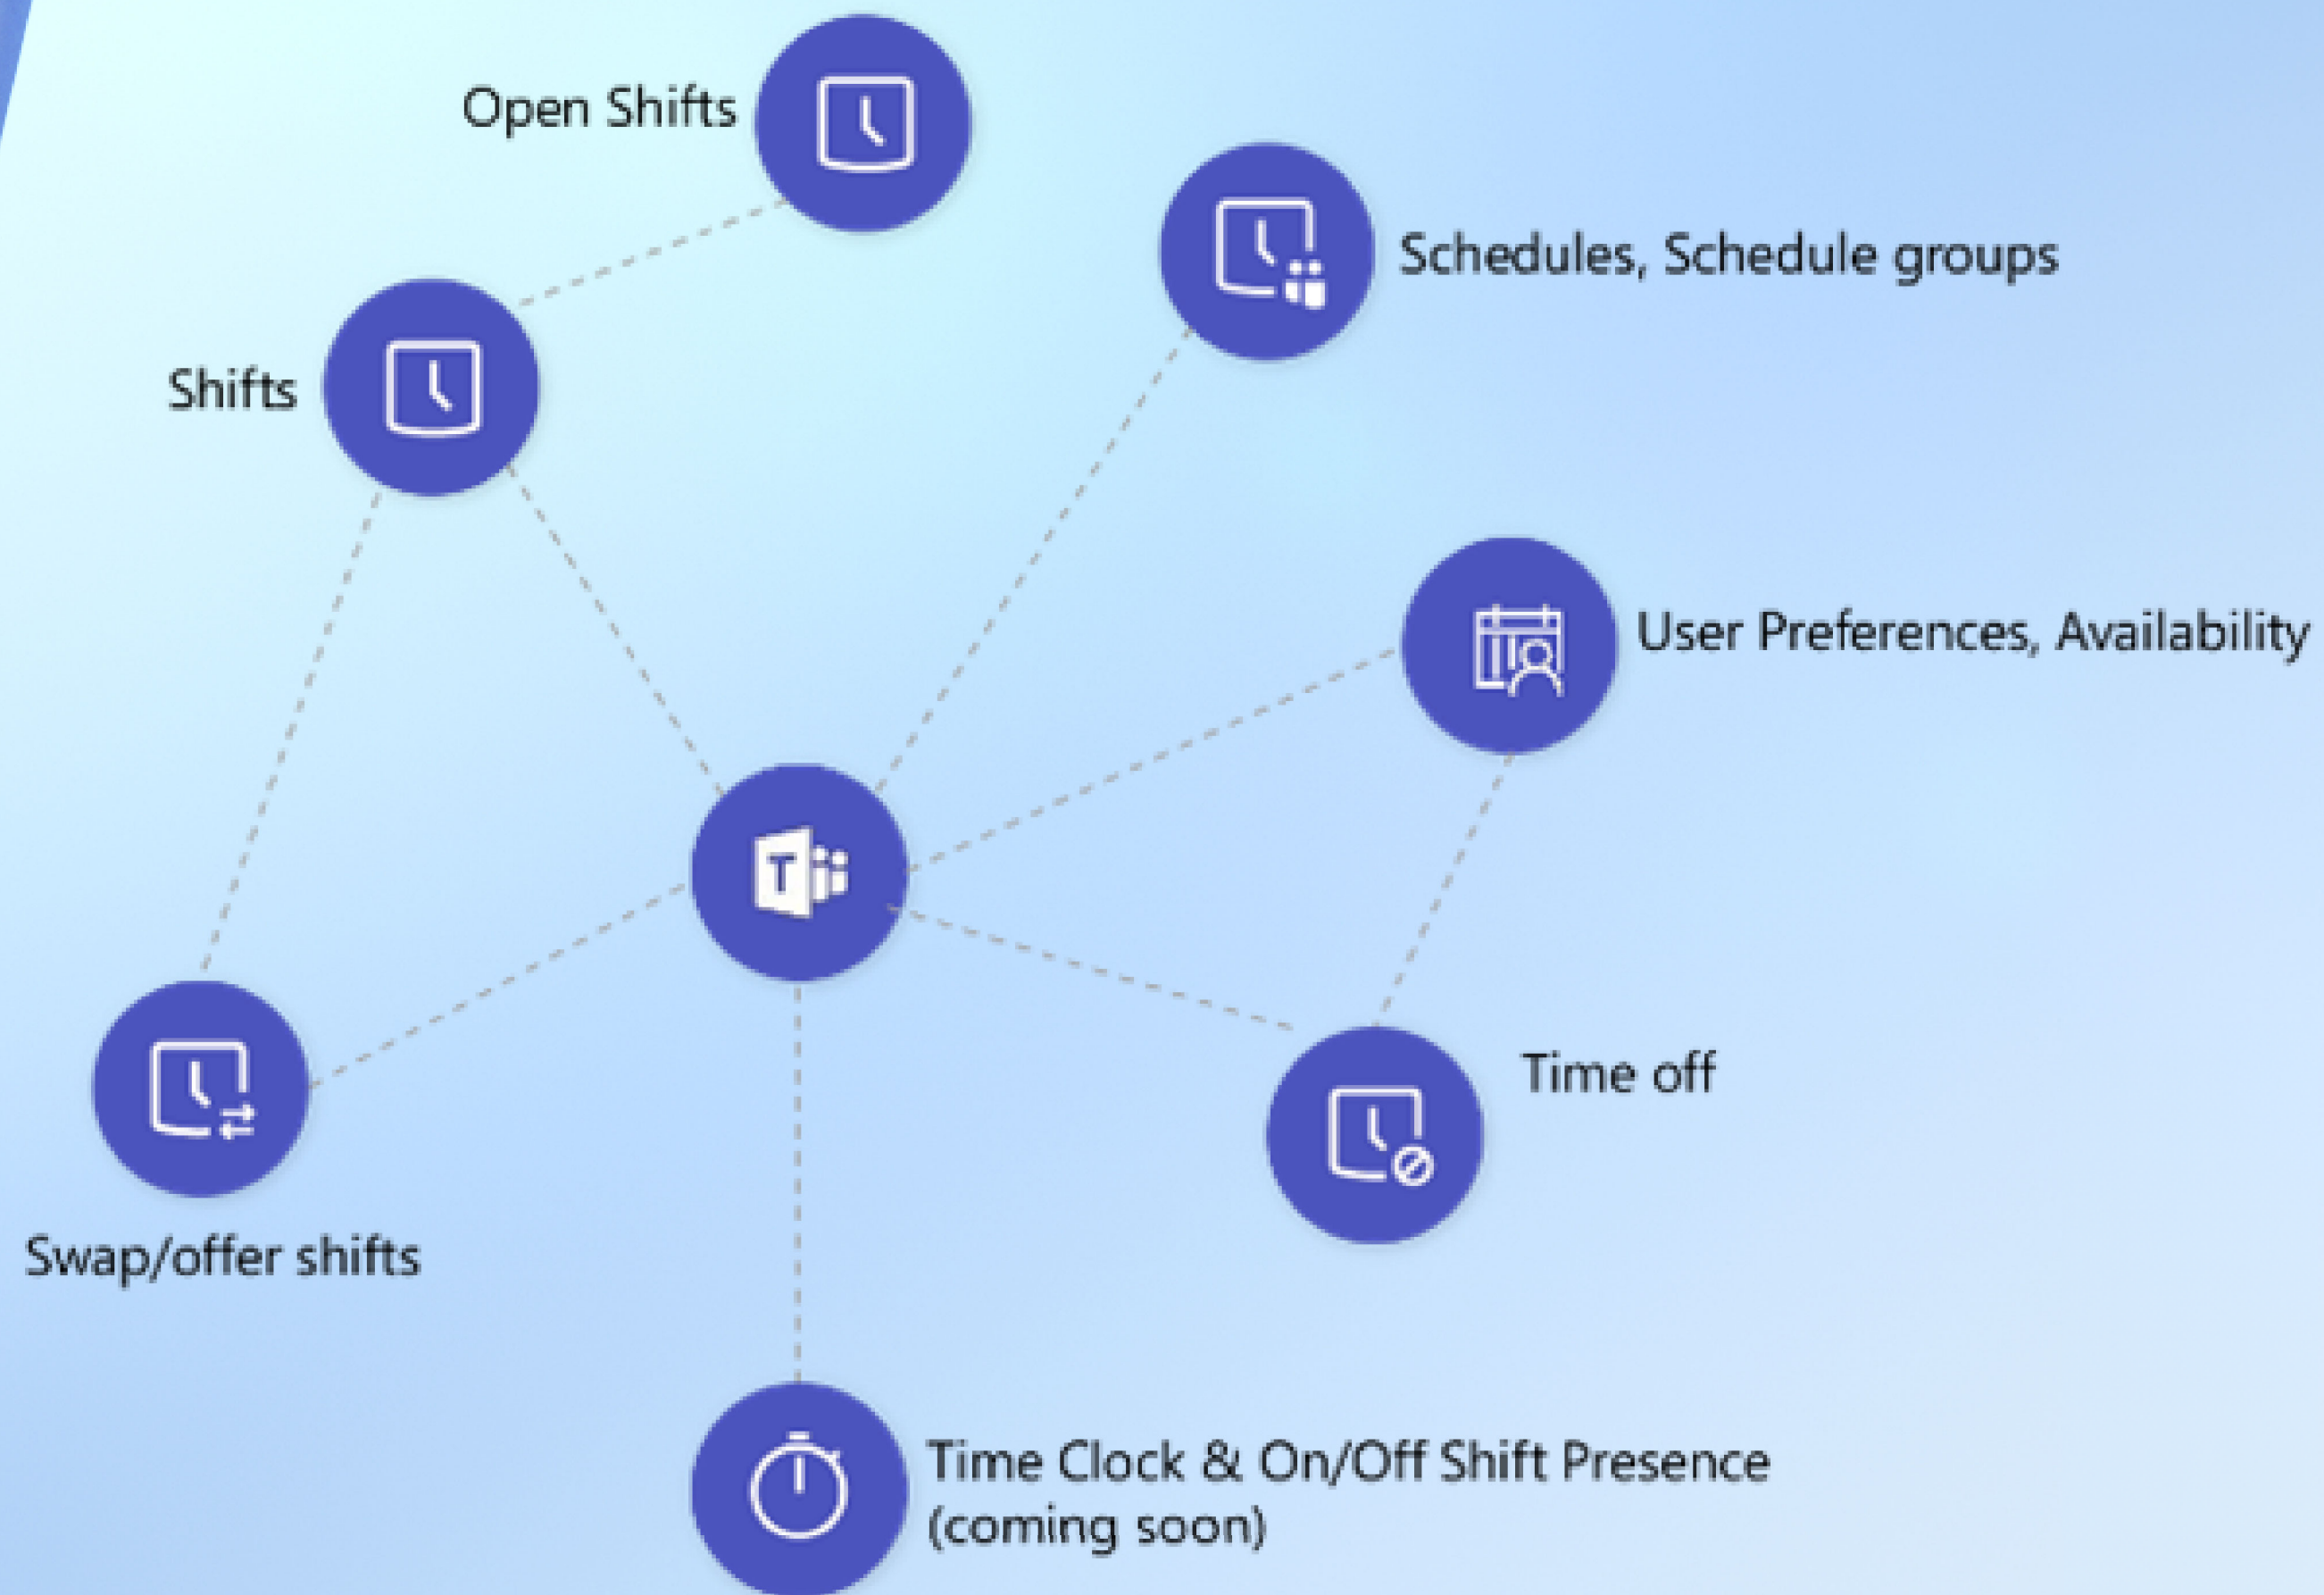

Be open (minded) about your shifts

Add open shifts into your team's schedule so managers can get shifts filled and workers can pick up the right shifts for them.

Time for a break?

Clock out with a digital time clock so no one forgets to track their time. Easily enable location detection to ensure team members are clocking in from a designated work site.

We light up with a little help from our friends.

Customize and extend shift scheduling with our workforce management partners.

Enable bi-directional shift management so scheduling becomes simple while still backed by all the policies you need to run your business.
